

ADAM WALKER

Olive Branch, MS 38654

Authorized to work in the US for any employer | Willing to relocate: Anywhere

SUMMARY

Functional Consultant and U.S. Army veteran with a background spanning software testing/QA, customer service systems support, network infrastructure, and emergency medical care. Currently expanding into full-stack web development through a bootcamp program, with hands-on certifications in HTML/CSS, JavaScript, and React.js. Brings a proven track record of process improvement, technical troubleshooting, and performing well in high-responsibility, detail-driven environments.

WORK EXPERIENCE

Functional Consultant

CACI Federal | Millington, TN

May 2023 – January 2026

- Provide direct support for the MyNavy HR Enterprise Testing Services Support (ETSS) contract, defining business plans, processes, policies, roles/responsibilities, communication strategies, and performance metrics.
- Develop strategic and transition plans; conduct research and analysis of business practices, cost/benefit analyses, and process improvements to strengthen organizational performance and service levels.
- Design, execute, and manage software test plans and test cases by analyzing Functional Requirements Documents (FRDs); perform functional, regression, and UAT testing; identify and track defects through resolution.
- Report defects and participate in formal/informal Test Readiness Reviews (TRR) and Production Readiness Reviews (PRR), collaborating closely with developers and stakeholders to ensure software quality across the lifecycle.

Customer Service Representative

Strategic Data Systems | Millington, TN

January 2022 – April 2023

- Provided personnel and administrative support to Navy sailors and their dependents, including record management, data entry, and emergency assistance, acting as a Navy Customer Service Representative (CSR).
- Advised sailors on Navy policy and required documentation (pay/allowances, assignments, record management) referencing the MILPERSMAN and local command instructions.
- Maintained accuracy and completeness of Electronic Service Records (ESR) via NSIPS, supporting career progression and selection board readiness.
- Managed pay, personnel, and transportation transactions and tracked customer inquiries in Salesforce/eCRM; used NP2 and legacy TOPS systems as required, including under approved Exceptions to Policy (ETP).

Cable and Internet Technician

TAK Communications | Memphis, TN

March 2021 – January 2022

- Installed and troubleshooted residential and commercial internet and cable television systems, ensuring optimal signal strength and connectivity.
- Surveyed sites and designed efficient cable routing plans for Coaxial and CAT6 installations in accordance with industry standards and safety codes.
- Terminated and tested CAT6 and Coaxial cabling, ensuring all circuits and connections functioned correctly.
- Configured internet networks (modems, routers, related equipment) and installed/configured IP-based security camera systems, integrating them with existing network infrastructure.
- Performed routine maintenance and upgrades on cable and internet systems to improve performance and proactively resolve issues.

Health Care Specialist (Medic), E-4 Specialist

United States Army | Fort Campbell, KY; Fort Carson, CO; Egypt

April 2014 – February 2021

- Managed daily operations of an emergency department within the 586th Field Hospital, providing immediate care and triage for trauma and illness cases.
- Served as primary first responder on the battlefield and during training exercises, including M4 ranges and air assault operations; performed ambulance operations for safe, rapid patient transport.
- Oversaw medical readiness and deployment eligibility for 500+ soldiers at the 586th Field Hospital and maintained health/compliance protocols for 300+ soldiers through proactive medical screening.
- Upheld medical readiness standards for a multinational contingent of thirteen nations (including Japan, Italy, and Australia) during the Multinational Force and Observers (MFO) peacekeeping mission between Egypt and Israel.
- Developed and led medical instruction programs for non-medical personnel and structured weekly medical classes

for multinational forces, strengthening cross-functional emergency response capability.
